

ABOUT ZAVOD GORELTEX

“ZAVOD GORELTEX” Co. Ltd. is the Russian high-tech integrated manufacturer of a wide range of explosion-proof electrical equipment that also conducts scientific research on the edge of technology.

Our mission is to supply the market of the CIS countries, the Customs Union and foreign countries with reliable explosion-proof, dust- and waterproof equipment of high quality. To develop, manufacture and timely deliver products, provide repair, installation and maintenance services at price which meets the demands of our customers.

ZAVOD GORELTEX TODAY:

- 25 years of experience in the field of explosion protection;
- 15 000 customers, including such large companies as Gazprom, Lukoil, Rosneft, Bashneft, Sibur, Surgutneftegaz, Rosatom, Novatek and Transneft;
- total area of 30 000 m²;
- the widest range of explosion-proof equipment in the territory of Russia;
- own testing laboratory;
- 600 employees;
- 8 branch offices and 3 production sites.

GEOGRAPHIC FOOTPRINT

“ZAVOD GORELTEX” Co. Ltd. has production sites in Saint Petersburg, Tyumen and Almaty (Kazakhstan), and this allows to deliver our explosion-proof equipment to the furthest regions and parts of our country.

Our offices are located in Saint Petersburg, Moscow, Kazan, Tyumen, Khabarovsk, Almaty (Kazakhstan), Minsk (Belarus). Such vast geographic footprint of our products allows us to be one of the leading manufacturers of explosion-proof equipment for hazardous industrial facilities in the territory of the Customs Union and the CIS countries, as well as foreign countries-partners of the RF, in the territory of which certification in IECEx and ATEX systems is in force.

PRODUCTION AND QUALITY ASSURANCE

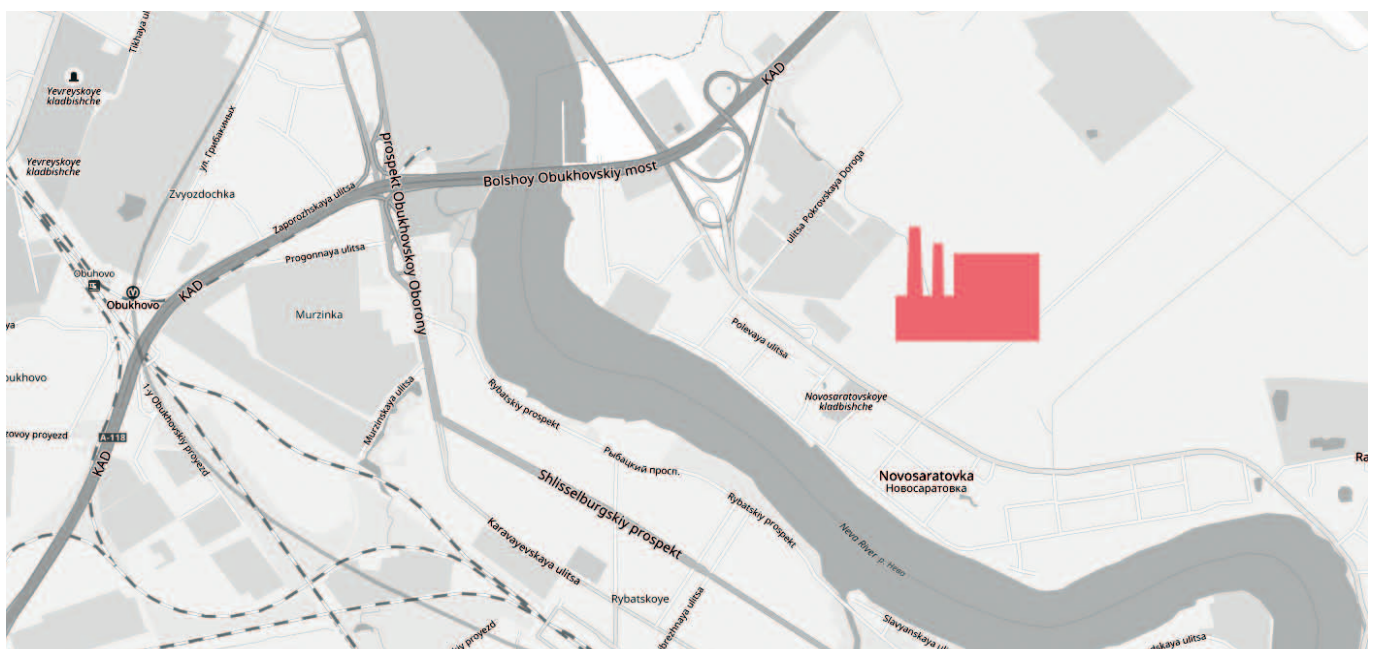

One of the big advantages of our plant is the use of own technology based on 77 years of experience of Prokopyevsk Plant of Mining Automation and on modern international practice of production of explosion-proof equipment.

All products are manufactured only from high-quality components. The products undergo thorough inspection in order to prevent re-jects. The integrated management system in conformity with the requirements of GOST R ISO 9001, OHSAS 18001, GOST R ISO 14001, GOST RV 0015-002 is implemented on the plant. Integrated management system is certified by NANIO CCVE, the only specialized organization accredited in IECEx in the territory of Russia and the CIS countries in the field of quality management of explosion-proof and mining electrotechnical equipment. Goreltext equipment is certified in accordance with the requirements of IECEx and ATEX systems.

Main advantage of “ZAVOD GORELTEX” Co. Ltd., as our customers believe, is the correlation between reasonable prices, highest quality and the shortest terms of delivery.

As of today, more and more companies from various fields of industry choose domestic manufacturers as equipment suppliers.

ZAVOD GORELTEX also provides onsite **audit services for explosion-proof equipment**.

CAD

Goreltex specialists developed a computer-aided design system GoreltEx. GoreltEx CAD system is intended for automated creation of drawings of explosion-proof terminal boxes, starters and local control and indicating stations. The system is distributed on free basis and is in free access at the official website of the company. The user is not required to have special skills in designing explosion-proof equipment or deep knowledge of current standards – the program does all calculations automatically. The system contains special algorithms which prevent occurrence of mistakes in the process of drawing creation.

COOPERATION WITH R.STAHL

Goreltex explosion-proof equipment plant acts as a production partner and official supplier for international projects of German corporation R.STAHL within the framework of localization of foreign manufacturers on the Russian market. ZAVOD GORELTEX manufactures at its own production site German products famous for their high quality and wear resistance.

R.STAHL is the world leader in production of automation for hazardous areas. Product range of our company is extended due to cooperation with R.STAHL. We are ready to offer to you not only explosion-proof equipment, but also elements of automation systems.

NEW PLANT – NOVOSARATOVKA

In the beginning of 2018 ZAVOD GORELTEX opened new electrotechnical plant in Saint Petersburg. New production site will allow our company to offer customers a wider range of explosion-proof equipment and components.

New plant conforms to all current international and Russian quality and safety codes. Total area is about 20 000 m², 8 000 m² of which are manufacturing facilities. New production site is located on the border of the city and Leningrad Region in Novosaratovka township near the Bolshoi Obukhovskiy Bridge.

The full production cycle is organized on the territory of new plant: a foundry, a rough machining section, a painting booth, a drilling and milling section, a welding section, an electrotechnical products assembly workshop, quality control department and other production sections. Manufacturing terms reduced dramatically as a result of optimization of production area and precise production logistics.

Increase of production area and machinery fleet has led to an increase of ZAVOD GORELTEX production capacity. We are to execute more orders and large batches of equipment are to be produced within shortest terms. Increased warehouse area allows to store large quantity of components and finished products, which will reduce considerably terms of product delivery to our customers.
